

SUSPENDED STORIES / STORIE SOSPESE

FILMS

A construction company hires Thomas, a professional rock climber, to supervise the building of a motorway tunnel in a small village in the south of Italy. The locals, led by a surveyor and a schoolteacher, accuse the company of carrying on the works not caring about the growing environmental risks these are causing. Thomas must choose sides when Alessandro, one of his colleagues and friends, gets severely injured because of an accident on the worksite: will he expose the company and lose his job, or stay quiet betraying his friend and the local community?
