# THE PROPERTIES OF METALS

[ LE PROPRIETÀ DEI METALLI ]

DIRECTED BY **ANTONIO BIGINI**

A small mountain village in 1970s Italy. Pietro, a child raised by his widower father, a surly man with money problems, begins to manifest mysterious gifts: he can bend metal simply by touching it. An American scientist starts studying him. The experiments will lead the child towards an invisible world where the unquestionable laws of physics collide with deepest human desires.
